

IN THE CLAIMS:

The text of all pending claims, (including withdrawn claims) is set forth below. Cancelled and not entered claims are indicated with claim number and status only. The claims as listed below show added text with underlining and deleted text with ~~strikethrough~~. The status of each claim is indicated with one of (original), (currently amended), (cancelled), (withdrawn), (new), (previously presented), or (not entered).

Please AMEND claims 1-15 in accordance with the following:

1. (CURRENTLY AMENDED) A computer-readable recording medium recorded with ~~a data item list display program for causing a computer to function as list display means for displaying a plurality of data items in different display forms in a list, the display forms corresponding to respective attributes of the data items and a current condition of each of the data items, and defining respective ways of displaying the list of data items based upon the respective attributes and the current condition of each of the data items~~method of displaying a plurality of data items in a list, the method comprising:

storing a plurality of display forms defining respective ways of displaying the list of data items, the display forms being different from each other in items to be displayed in columns of the list; and

displaying each of the data items in the list in a corresponding one of the display forms based on an attribute and a current condition of the data item so that the item to be displayed in a corresponding one of the columns of the list is variable in accordance with the data items.

2. (CURRENTLY AMENDED) The recording medium as claimed in claim 1, wherein ~~the program causes said list display means to include~~said storing a plurality of display forms comprises storing a table of correspondence between the attributes and the display forms, and to said displaying each of the data items in the list comprises ~~determine~~ determining the display forms of the data items displayed in the list by referring to the table by the respective attributes of the data items.

3. (CURRENTLY AMENDED) The recording medium as claimed in claim 2, wherein ~~the program causes said table to have~~includes the display forms corresponding to the attributes and predetermined conditions, and said displaying each of the data items in the list further comprises ~~causes said list display means to determine~~ determining the display forms of the data items displayed in the list by referring to said table by the respective attributes and contents of

the data items.

4. (CURRENTLY AMENDED) The recording medium as claimed in claim 1, wherein ~~the program causes said list display means to~~said displaying each of the data items in the list comprises adding icons of different sizes corresponding to the display forms to the data items in displaying the data items.

5. (CURRENTLY AMENDED) The recording medium as claimed in claim 4, wherein ~~the program causes said list display means to function as alignment and display means for~~said displaying each of the data items in the list further comprises aligning and displaying each of the data items of the different display forms.

6. (CURRENTLY AMENDED) The recording medium as claimed in claim 5, wherein ~~the program causes said alignment and display means to function as area management means for~~said displaying each of the data items in the list further comprises managing an area in which data items are displayed and an area required to display the data items of the respective display forms.

7. (CURRENTLY AMENDED) The recording medium as claimed in claim 5, wherein ~~the program causes said list display means to function as~~said displaying each of the data items in the list further comprises sorting and display means for sorting and displaying the data items of the respective display forms.

8. (CURRENTLY AMENDED) The recording medium as claimed in claim 1, wherein ~~the program causes said list display means to function as column header display means for~~said displaying each of the data items in the list comprises displaying a column header corresponding to a display form of a selected one of the data items displayed in the list.

9. (CURRENTLY AMENDED) The recording medium as claimed in claim 8, wherein ~~the program causes said list display means to function as column display width change means for~~said displaying each of the data items in the list further comprises changing a column display width of one of the data items which one corresponds to a displayed column header by changing a column display width of the displayed column header.

10. (CURRENTLY AMENDED) A data item list display apparatus for displaying a plurality of data items in a list, the apparatus comprising:

~~list display means for displaying a plurality of data items in different display forms in a list, the display forms corresponding to respective attributes of the data items and a current condition of each of the data items, and defining respective ways of displaying the list of data items based upon the respective attributes and the current condition of each of the data items~~ a storage part configured to store a plurality of display of forms defining respective ways of displaying the list of data items, the display forms being different from each other in items to be displayed in columns of the list; and

a list display part configured to display each of the data items in the list in a corresponding one of the display forms based on an attribute and a current condition of the data item so that the item to be displayed in a corresponding one of the columns of the list is variable in accordance with the data items.

11. (CURRENTLY AMENDED) The apparatus as claimed in claim 10, wherein said list display ~~means-part~~ adds icons of different sizes corresponding to the display forms to the data items in displaying the data items.

12. (CURRENTLY AMENDED) The apparatus as claimed in claim 11, wherein said list display ~~means-part~~ comprises an alignment and display means-for-part to aligning and displaying each of the data items of the different display forms.

13. (CURRENTLY AMENDED) The apparatus as claimed in claim 12, wherein said list display ~~means-part~~ comprises a sorting and display means-for-part to sorting and displaying the data items of the respective display forms.

14. (CURRENTLY AMENDED) The apparatus as claimed in claim 10, wherein said list display ~~means-part~~ comprises a column header display means-part for-to displaying a column header corresponding to a display form of a selected one of the data items displayed in the list.

15. (CURRENTLY AMENDED) A method of displaying a plurality of data items in a list, the method ~~displaying a plurality of data items in different display forms in a list, the display forms corresponding to respective attributes of the data items and a current condition of each of the data items, and defining respective ways of displaying the list of data items based upon the~~

~~respective attributes and the current condition of each of the data items~~comprising:

storing a plurality of display forms defining respective ways of displaying the list of data items, the display forms being different from each other in items to be displayed in columns of the list; and

displaying each of the data items in the list in a corresponding one of the display forms based on an attribute and a current condition of the data item so that the item to be displayed in a corresponding one of the columns of the list is variable in accordance with the data items.

16. (CURRENTLY AMENDED) The recording medium as claimed in claim 1, wherein ~~the program causes said list display means to~~said displaying each of the data items in the list comprises change-changing types of fonts based on the display forms of the data items in displaying the data items.

17. (CURRENTLY AMENDED) The apparatus as claimed in claim 10, wherein said list display ~~means~~part changes types of fonts based on the display forms of the data items in displaying the data items.
